

# DEEP RECOVERY

RECHARGE THE CELL, NOT JUST THE SKIN

// *"I like going into nature, listening to insects and birds. Their communication is perfectly synchronized. Everything on Earth has its own frequency. We don't try to change your rhythm; we respect the way you bloom."*

— THE PHILOSOPHY OF XIHE

# WE KNOW YOUR CELL

XIHE medical-grade graphene, developed by Academician Zheng Nanfeng's team, uses a special process to create flexible heating films with a precise **5-15 $\mu$ m spectrum**.

It understands your cells, resonates with them at the same frequency, composing the most beautiful symphony of life through pure physics.

 Resonating cells

# THE TRIAD OF BIO-INTELLIGENCE

## SPECTRAL PURITY

8-14 $\mu$ m. The only wavelength your mitochondria recognize as essential energy. Precision defined by the laws of physics.

## CELLULAR RESONANCE

ATP synthesis accelerated. Not by chemistry, but by bio-physical resonance. We speak the internal language of cells.

## BIO-INTELLIGENCE

Your body knows the frequency. We just help it remember. Bio-feedback mechanisms optimized through 5-15 $\mu$ m waves.

# THE HUMAN POWER GRID

37T

**MICRO-BATTERIES**

## **WIRELESS CHARGING FOR LIFE**

Imagine your body as 37 trillion micro-batteries. XIHE acts as a wireless charging station, delivering the exact frequency required to restore the transmembrane proton gradient and ignite mitochondrial vitality.

# THE SCIENCE OF RESONANCE

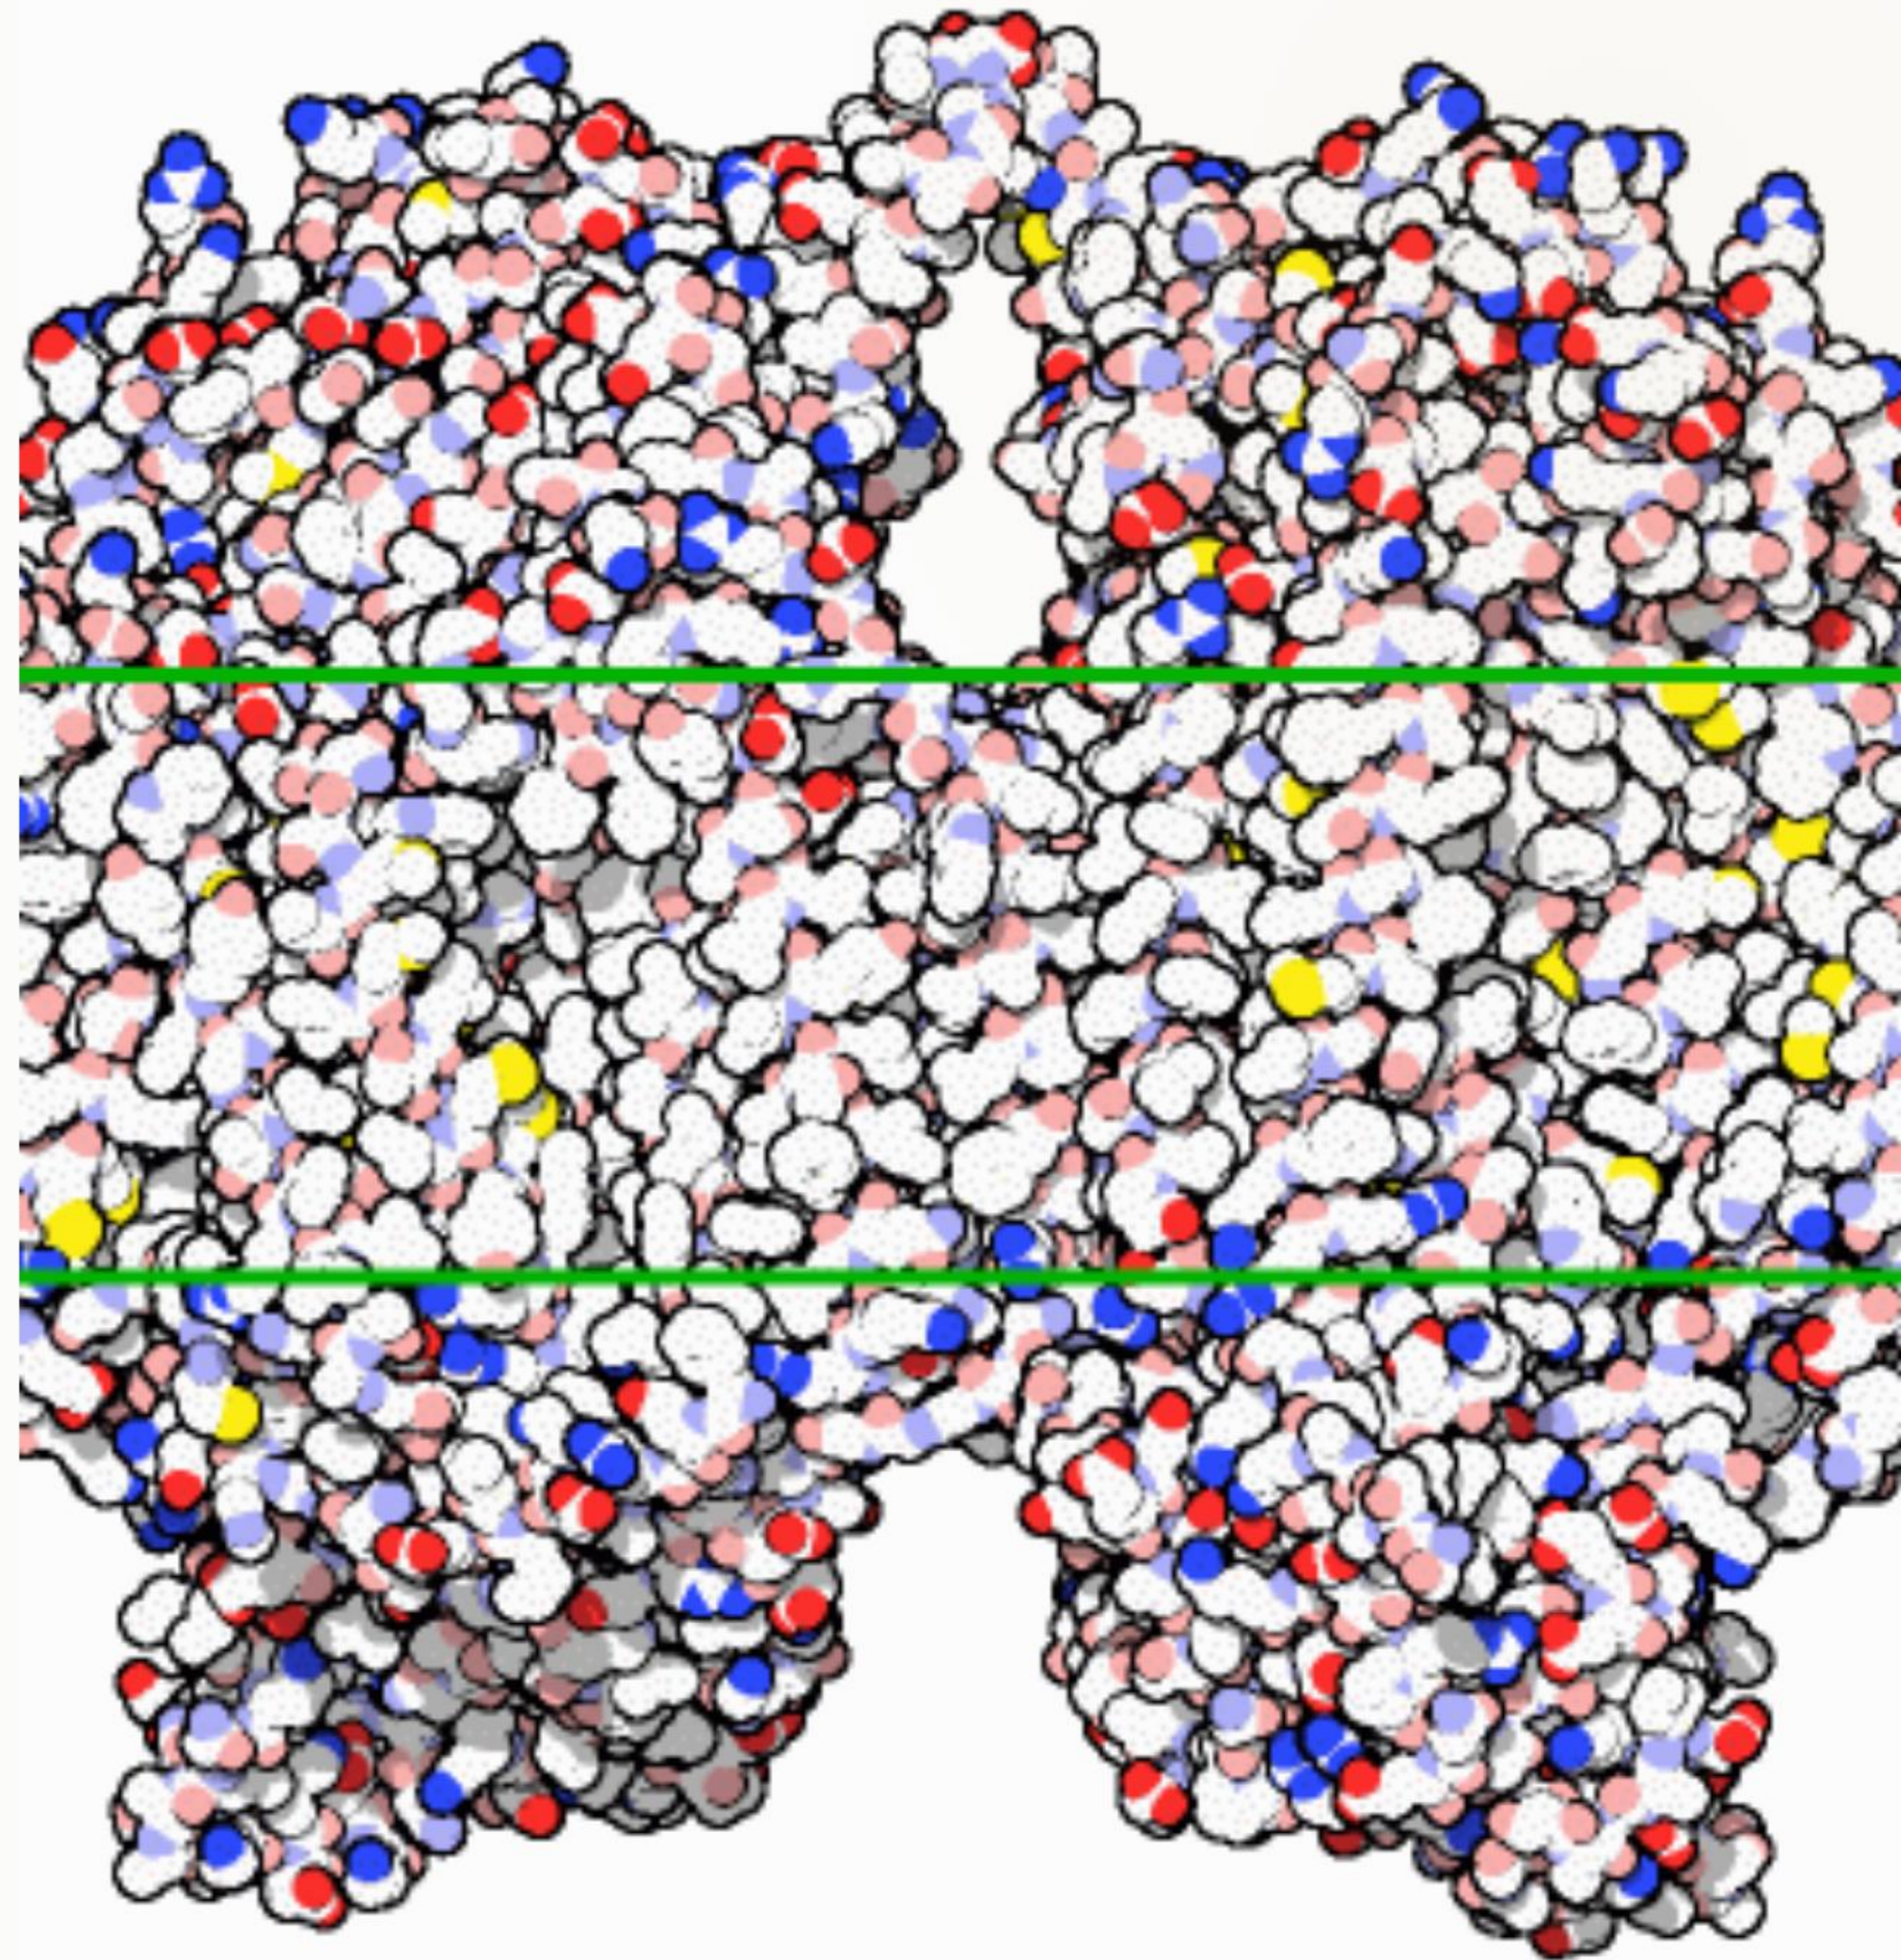

FROM PLANCK'S LAW TO CELLULAR ATP

# CCO ACTIVATION

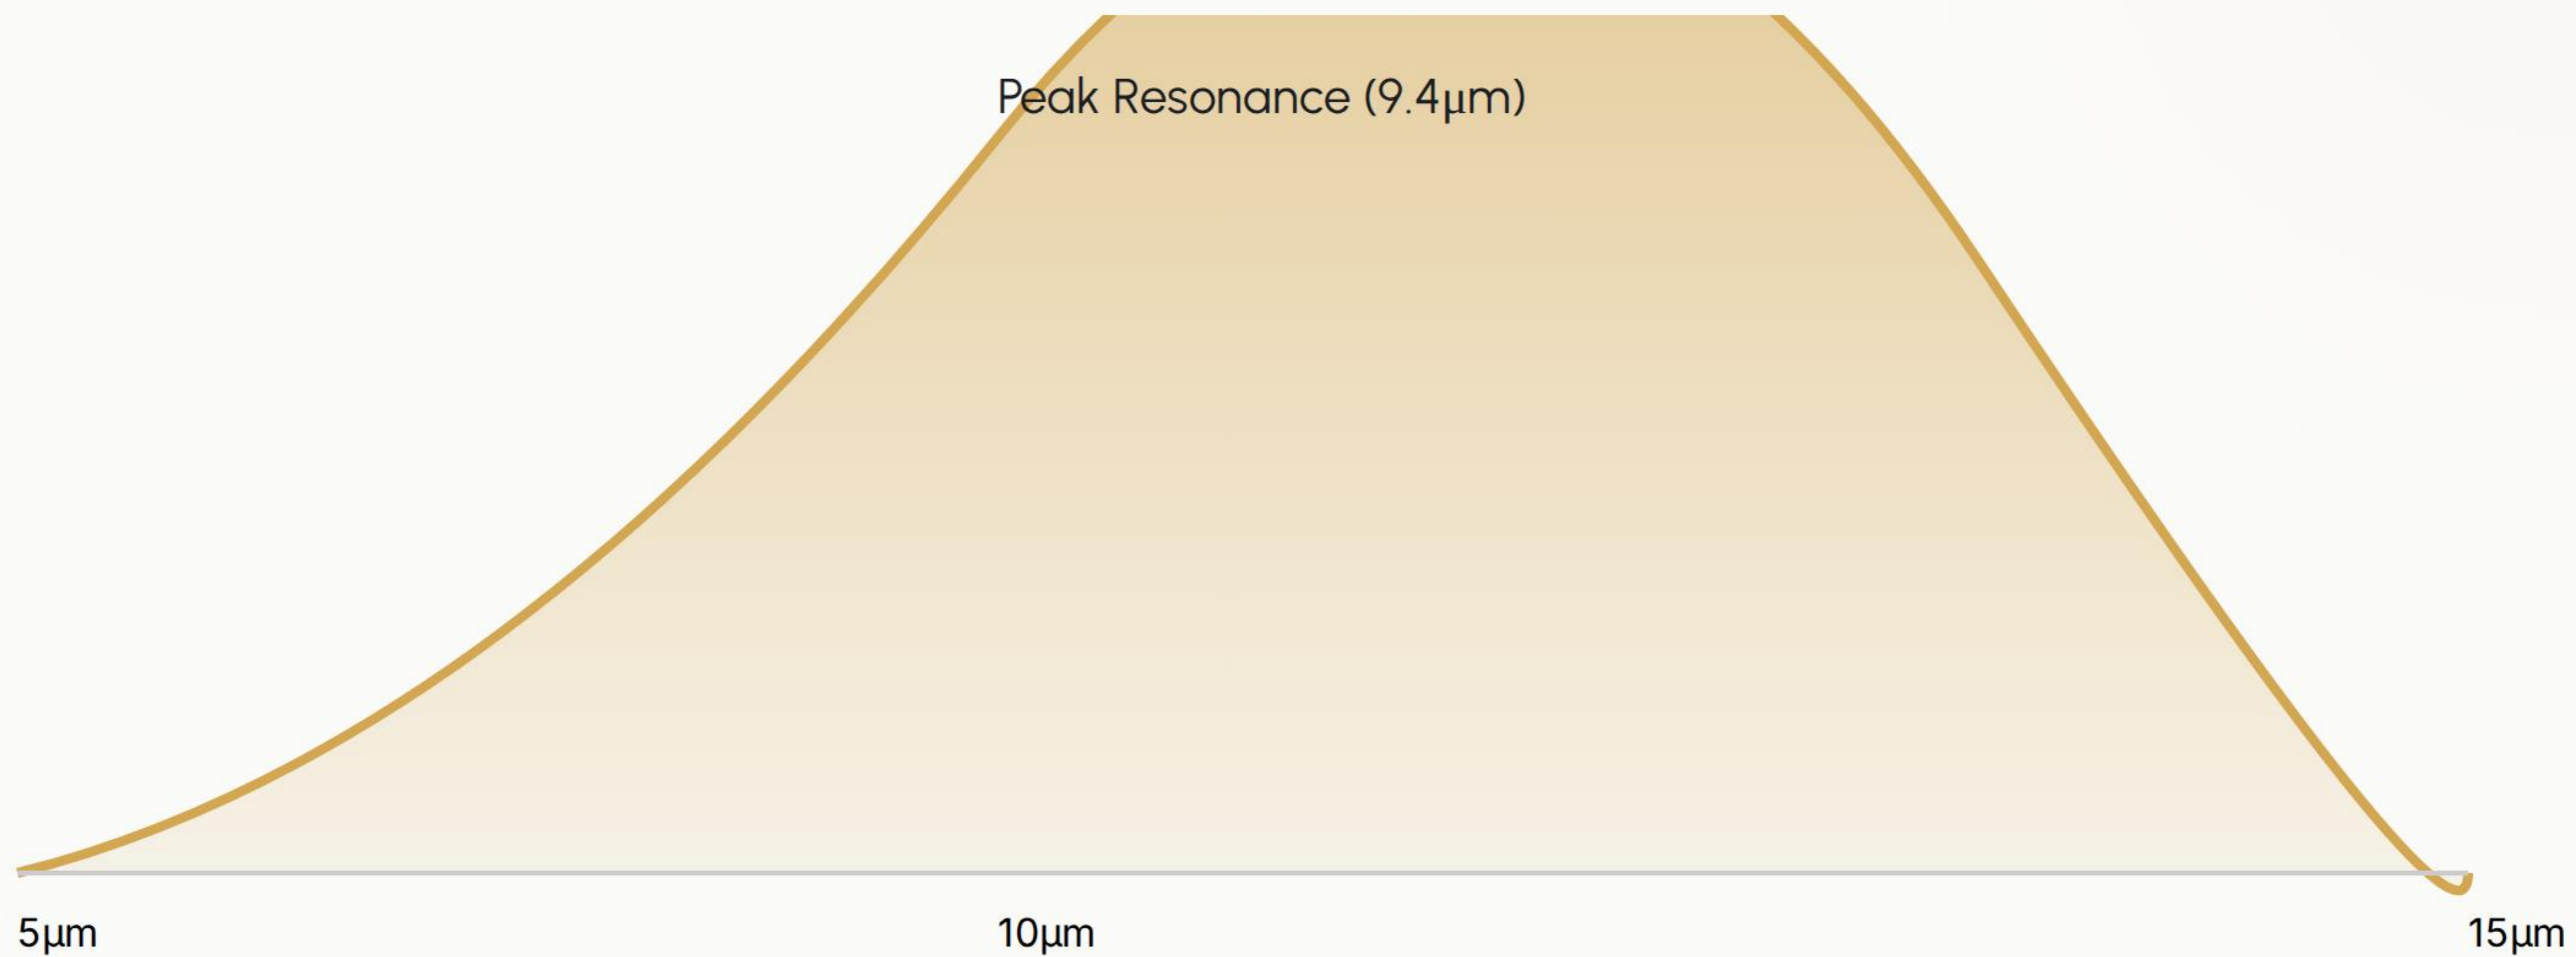

**The Trigger:** 8-14 $\mu$ m graphene far-infrared light waves.

**The Target:** Cytochrome c Oxidase (CcO), the "Gatekeeper" of cellular energy.

**The Result:** Photobiomodulation (PBM) triggers an electron transport chain surge, resulting in immediate ATP production increase.

# SPECTRAL HARMONY

*Graphene spectral emission perfectly aligned with human biological absorption bands.*

# PRECISION SPECIFICATIONS

PARAMETER	TECHNICAL STANDARD	VERIFICATION SOURCE
Wavelength Range	5 - 15 $\mu$ m (Peak 9.4 $\mu$ m)	Planck's Blackbody Law
Far-Infrared Emissivity	> 0.98	National Standard GB/XXXX
Technology Origin	Graphene Nanofilm (0.335nm)	Acad. Zheng Nanfeng Team
Safety Mechanism	Non-ionizing Radiation	IKKEM Lab Verification

# BIO-ENERGY RESPONSE MATRIX
